MTP8000Ex SERIES

INTRINSICALLY SAFE TETRA PORTABLE RADIOS

MOTOROLA SOLUTIONS

POWER AND PERFORMANCE DESIGNED FOR EXTREME ENVIRONMENTS

The MTP8000Ex series intrinsically safe TETRA radios have been engineered to address workers' needs and offer reliable radio communications in hazardous environments. From their form to their function, these radios are certified to the latest standards listed by ATEX and IECEx.

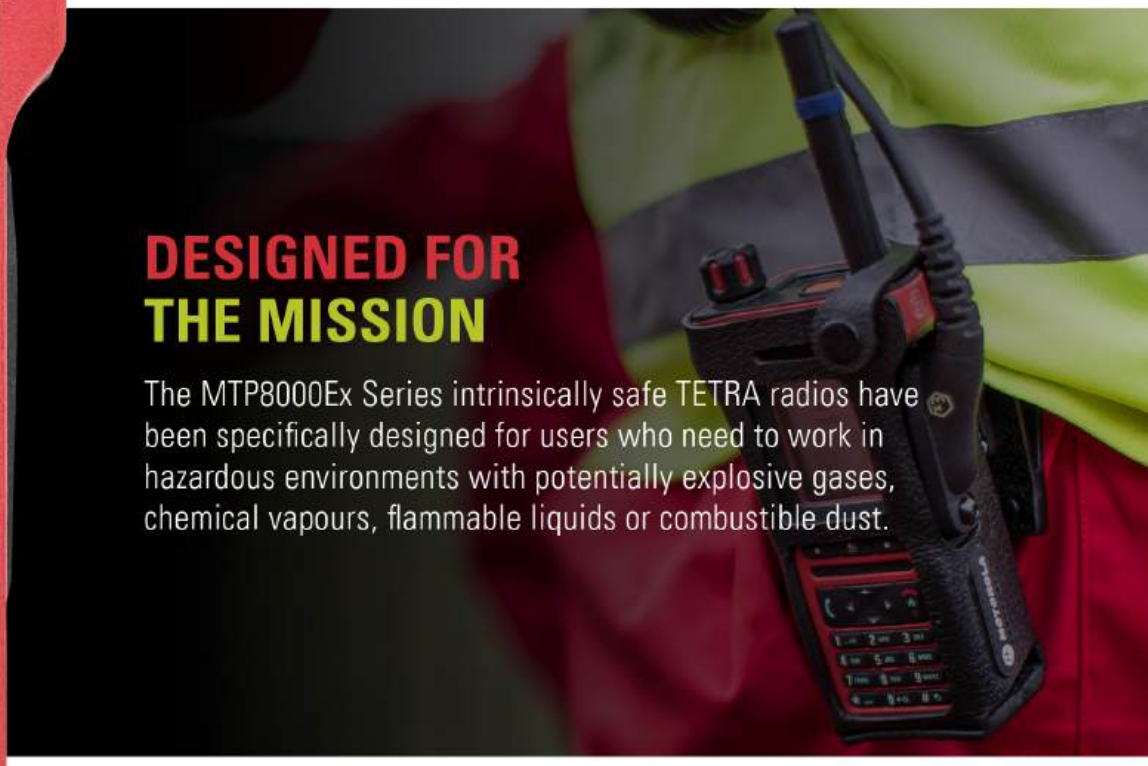
Motorola Solutions has more than 20 years of experience in providing intrinsically safe two-way radios. We have used this knowledge and experience to develop the rugged MTP8000Ex series intrinsically safe TETRA radios, giving workers the ability to work safely. The radios have powerful audio, enhanced coverage, long battery life, and advanced ergonomics for ease of use.

OIL AND GAS

Workers in the Oil and Gas industry are constantly at risk of escaping flammable gases or liquids and they are often required to work in extreme conditions of heat and dust or cold and wet. Good communications are the key to operating effectively in these dangerous conditions and workers rely on intrinsically safe radios to keep them safe.

MINING

Combustible dust and escaping flammable gases, such as methane, are a major risk in the mining industry. Communication is key to working effectively in such hostile and dangerous conditions and intrinsically safe radios are needed to keep miners safe particularly when explosives are used.



DESIGNED FOR THE MISSION

The MTP8000Ex Series intrinsically safe TETRA radios have been specifically designed for users who need to work in hazardous environments with potentially explosive gases, chemical vapours, flammable liquids or combustible dust.

FIRE AND RESCUE

Fire and Rescue teams have long relied on two-way radios to provide effective communications and save lives. But when firefighters respond to an incident with an explosion risk from gases or combustible dust, for example a traffic accident involving a petrol tanker or an incident at a manufacturing plant, they need intrinsically safe radios to communicate safely and prevent an incident from becoming an emergency.

AIRPORTS

Communications are of great importance. But wherever there is a potential exposure to fuel, there is a risk of explosion. Increasingly, intrinsically safe radios are used in areas where workers and on-site fire crews are in close proximity to aviation fuel to keep them safe.

MTP8000Ex SERIES
INTRINSICALLY SAFE TETRA RADIOS

The MTP8000Ex series intrinsically safe TETRA portable radios are certified to the latest standards listed by ATEX and IECEx. They have been carefully engineered to address workers' needs and provide reliable and efficient communications in hazardous environments.

The MTP8500Ex has a limited keypad, ideally suited for use while wearing heavy gloves. For users that need a full keypad we offer the MTP8550Ex.

DESIGNED FOR HAZARDOUS ENVIRONMENTS

The MTP8000Ex series radios radios are certified to the latest standards listed by ATEX and IECEx for users who work in areas with potentially explosive gases, chemical vapours, flammable liquids or combustible dust.

These radios are built to work in tough and hazardous environments, in both the cold and wet or the dust and heat, with IP65, IP66 and IP67 ratings.

Your users' radios can be easily identified without causing any risk to user safety, through the nameplate, rather than through the use of stick-on labels or external markers that can compromise the ATEX and IECEx certification.

EASY TO USE

The MTP8000Ex series has innovative features and advanced ergonomics to make it easy to use. The intuitive user interface, large main colour display and the secondary top display make it easy to see emergency notifications, talk group status or battery condition.

The T-Bar profile, exaggerated control knob, tactile keypad, enlarged emergency button and textured PTT button make it easy to hold and use the radio.

The MTP8500Ex has a limited keypad, ideally suited for use while wearing heavy gloves. For users that need a full keypad we offer the MTP8550Ex.

ENHANCED COVERAGE

High receiver sensitivity and high transmit power gives the MTP8000Ex series great coverage and enhanced in-building performance. For extra safety, the radio is fitted with an LED coverage indicator at the base of the antenna, alerting the user when coverage is poor.

With a long battery life, workers can be confident that the MTP8000Ex series radios will be ready for a longer shift in the event of emergencies or unplanned situations.

LOUD AND CLEAR AUDIO

The MTP8000Ex series is optimised for excellent audio performance in all types of noisy environments. Audio through both the speaker and accessories is clear, even at full volume, and the user can be heard clearly against loud background noise.

INTEGRATED BLUETOOTH®

Bluetooth enables a range of wireless accessories and collaborative devices to be paired with the radios from headsets and microphones for use in loud environments to large PTT buttons for use with protective clothing, reducing the risk of catching wires.

Smart device applications can be developed to control the radio via Bluetooth. In addition, Bluetooth can be used to pair the radios with bio-monitors or gas sensors to automatically alert control and the workers to dangerous conditions.

DEVICE SERVICES FOR YOUR MTP8000Ex SERIES RADIOS

You and your users count on your radios to operate at optimal efficiency.

To help support the performance of your MTP8000Ex series radio fleet and maximise the value of your investment, we offer a variety of service packages that transfer the risk and responsibility to Motorola Solutions to provide the right level of services for your radio fleet needs. The service capabilities offered include[1]:

HARDWARE REPAIR:
Troubleshooting, testing and repair of your equipment at a centralised facility.

ACCIDENTAL DAMAGE:
When the unexpected happens, we have you covered with a quick repair turnaround.

TECHNICAL SUPPORT AND SERVICE DESK:
Remote technical support services to ensure that your radios are rapidly restored and functional.

SOFTWARE MAINTENANCE:
Access to latest certified software releases ensure reliable and secure device operations.
